Durex. Acrotel SB Metal Primer

Solvent-Based Metal Primer

Description Durex® Acrotel SB Metal Primer is a single-component, solvent-based, high-performance acrylic polymer metal

primer.

Ideal For

Features

Uses Durex® Acrotel SB Metal Primer is specially formulated to be used as an easy-to-use primer for metal surfaces.

Simple, easy to use, versatile coatingLow odour and VOCs

· Water and alkaline resistant

Steel rebar and beams

• Excellent resistance to saponification, caused by alkaline substrates

· Industrial steel parts which require fast drying and excellent adhesion

· Fast drying and early water resistance

• Leveling, flow and microform-free properties

· Adheres to a variety of metal substrates

Outstanding exterior performance properties

TECHNICAL DATA

PHYSICAL PROPERTIES		
Colour	Please see Durex® Colour Selection Guide for available colour options.	
Resin Type	Acrylic copolymer	
Coverage	$5 \text{ m}^2/\text{L}$ (300 ft ² /gal) @ 3 mils WFT	
Cure Time @ 23°C (75°F), 55% RH	To touch/recoat: 1 hour	
	Fully cured: 2 hours	
Sheen	Flat, <2% @ 85°	
pH Level	8.0-9.0	
Reducer/Clean-up	Water	

PERFORMANCE PROPERTIES	TEST METHOD	RESULTS
Percent Solids	ASTM D7232-06	40 ± 2% (vol.)
Viscosity (Brookfield) 23°C (75°F)	ASTM D2196	70-80 KU
V.O.C.	ASTM D3960-05	160 g/L
Specific Gravity	ASTM D333	1.15 ± 0.05 g/L
		9.60 ± 0.1 lb/gal

Packaging

Durex® Acrotel SB Metal Primer is packaged in 18.9 L (5 gal) and 3.78 L (1 gal) pails. This product is available in multiple standard colours. Custom colour matching can also be attained at an additional cost. Please refer to the *Durex® Colour Selection Guide* for all available colour options.

Storage Conditions

Store Durex® Acrotel SB Metal Primer in a dry, vented, waterproof location, stacked off the ground, out of direct sunlight and other detrimental conditions. Store liquid materials in ambient temperatures above 5 degrees C and below 35 degrees C. **KEEP FROM FREEZING**.

Surface Preparation

All surfaces to be coated must be free of dirt, oils or any other contaminants that may prevent proper adhesion of Durex® Acrotel SB Metal Primer. Mechanically abrade all metal surfaces and clean with solvent wipe. Inspect the surface for any contamination. Grease or oil should be removed by solvent in accordance with SSPC-SP1 or ASTM D609 for steel surface and ASTM D1730 for aluminum and alloy. Blast cleaning is recommended for entire surface and weld seams SSPC-SP 6 or NACE 3. The surface must be completely cleaned, rinsed and dried; otherwise the paint may not bond properly to the surface.

Application

Use a good-quality synthetic brush, roller or airless spray to apply an even coat of Durex® Acrotel SB Metal Primer. Maintain a wet edge to prevent overlap marks and gloss differences. Durex® Acrotel SB Metal Primer is designed as a one-coat system; therefore, a single coat is sufficient to cover the entire surface.

Note: Film formation of Durex® Acrotel SB Metal Primer depends on temperature and humidity. Minimum film formation temperature is 10 degrees C and maximum relative humidity is 60%. As a rule, lower temperature and higher humidity will result in longer curing time.

Clean-Up

Wash tools and equipment immediately after use with warm water and mild detergent.

Health and Safety

Take suitable fire precautions. Use under well-ventilated conditions with appropriate respirator approved for organic vapours and rubber gloves when handling the product. Avoid contact with eyes and prolonged contact with skin. If contact occurs, flush immediately with water and seek medical attention if irritation occurs. Harmful if swallowed. Do not induce vomiting. Drink 1-2 glasses of water or milk. Keep product out of reach of children. Read published Material Safety Data Sheet for additional information.

Warranty

Durabond warrants this product is free of manufacturing defects, and will replace at no charge, provided it has been applied within 12 months of purchase, it has been installed for uses suitable for this product and in accordance with the manufacturer's instructions.

Technical Services

Technical support is available upon request at info@durabond.com. For the latest version of this data sheet, please visit our website at www.durabond.com, call toll free at 1-877-DURABOND (387-2266) or speak with your Durabond Technical Coatings Ltd sales representative.
