BASE:
Durex®
EPS Base

FIRST LAYER:
Durex® Trim Cast White +
Durex® Fibreglass Mesh
2.6oz or 4.3oz

FINISH LAYER:
Durex® Trim Cast White cures to a natural white
stone finish

NEW

Durex® Trim Cast natural stone finishes for architectural mouldings

Durex® Trim Cast is a two-component polymer-based cementitious base coat consisting of a water-based acrylic liquid component Cast Bond, mixed with the dry component Trim Cast. Durex® Trim Cast mix utilizes advanced polymer technology combining the strength and toughness of polymer-modified cement with the flexibility of synthetics.

IDEAL USE

Durex® Trim Cast provides a natural stone finish to interior and exterior architectural mouldings. It is also a breathable and water resistant decorative element that can be easily applied to any project.

FEATURES

- Superior adhesion to various inorganic substrates
- Combines the strength of cement with the flexibility of synthetics
- Designed to allow minor movements in the substrate without causing cracking in the base coat
- Excellent job site quality control
- Breathable coating; allows water vapour within the wall system to evaporate
