Durex_® Restoration Guide

Horizontal Under Side Shallow Repair

Description

Deteriorated, surface spalling concrete with no exposed and / or rusting steel reinforcement.

Identification

- Identify all spalls and delaminations on the horizontal and vertical concrete elements by the use of chain-drag or hammer. Outline areas to be removed with red spray paint.
- Identify any unsound concrete, poor patching, poor concrete or other condition that will adversely affect the installation and/or proper functioning of the coating. Outline areas with red spray paint.
- Obtain Engineer approval on spalls and delaminations which are to be removed and those areas which are to be repaired.

Substrate Preparation

- Remove all defective and/or delaminated concrete by suitable means, until sound concrete is reached.
- Check for and remove any additional delaminations caused by previous removal.
- The repair areas shall be wire-brushed with an electric hand-grinder, including any reinforcing that is uncovered until the area is free of loose concrete, dirt and/or corrosion products.
- Where the parent concrete is sound and the repair consists of replacing the parge coat only, The surface of the parent concrete shall be mechanically abraded.

Repair Steps

- 1. The prepared surface shall be thoroughly wetted down for a period of not less than ½ hour prior to placement of repair material.
- 2. Apply the cement slurry-bonding coat in accordance with good practice.
- 3. Apply the repair material while the bonding agent is still wet.
- 4. The repair material should be cured by covering with wet burlap covered with polyethylene sheets, as soon as the surface will support it.

Steps	Products	Mix Design	Coverage
1	Cement Slurry-bonding coat	 2 parts Durex Acrylic Resin Bond to; 1 part Portland Cement Type 10 (P350)	2 m ² /liter depending on surface conditions
2	Durex Dur-A-Patch Durex Acrylic Resin Bond	 1 Bag Dur-A-Patch 5 Ltrs Durex Acrylic Resin Bond 	1.0 m ² @ 15 mm thick
3	Durex Architectural Coatings	Not Required (ready mixed) (see Finishes)	Refer to data sheet of selected coating
